EXPERIENCE

Project Name: CoinsHub

Project Overview

The aim is to develop a crypto price tracker website, where users can see the day-to-day price of the crypto coins using Coin-Gecko API

Roles & Responsibilities

- Build a responsive site react.js & style using CSS and Bootstrap
 - Add carousel using "React Slick" & navigation using ReactRouter-DOM
 - Fetched coins data using "Axios" from "Coin-Gecko" API
 - Used simple area chart from reacting "Re-Charts"
 - Complete task within the fixed time & deploy in "vercel"
-

Project Name: Book My show -Clone

Project Overview

The aim is to clone the book my show website within a given time using the TMDB Movie database to fetch the movie data

Roles & Responsibilities

- Build a responsive site react.js & style using CSS and Tailwind CSS
 - Develop a sample picture & replace it with actual movie posters using "Axios" and "react-hooks"
 - Add carousel using "React Slick" & navigation using ReactRouter-DOM
 - Complete task in the given time and deploy in "Vercel"
-

Project Name: Meme Generator

Project Overview

The aim is to develop a fun application where users can generate memes using this application with simple steps

Roles & Responsibilities

- Build a responsive site react.js & style using CSS and Bootstrap
- Fetch meme from API & add an event handler to a button to generate a random image
- Write a function to appear user-entered text over the meme image
- Used simple area chart from reacting "Re-Charts"
- Complete task within the fixed time & deploy in "vercel"
